World WTSP Catalogs of TRIZ & Around-TRIZ Websites Process and Documents

(1)	Initial Survey (in a country)	Internet survey + recommendation -> Visit one by one -> Brief introduction + grading & Roles
(2)	Preliminary Manuscript of Country Catalog	List of selected sites -> Site introduction by owners -> Index + Site description
(3)	Completed Manuscript of Country Part	Checking with other existing Catalogs -> Categorization with grading & Roles (editing work by Project Leader)
(4)	Published Country Part	Published as a source data of the country part
(5)	Published World WTSP Catalogs	Integration into the World Catalogs

We have just submitted our Final Paper to ETRIA TFC2023. **"WTSP Report (6) Catalogs of TRIZ and Around-TRIZ Sites in the World (Preparing for Gamma Edition)"** by Toru Nakagawa et al. The paper reports our recent activities for building the World WTSP Catalogs, with special attention to overcoming the difficulty: "Many TRIZ colleagues support the WTSP Project, but very few of them actually work to build the World WTSP Catalogs". You have seen such WTSP activities and situations in my series of LinkedIn Postings, such as Abstract , Values of the Catalogs , Call for Contributions , Current World TRIZ Catalogs , etc.

Contributions of manuscripts from country teams have been very little for these six months. Thus, we have decided to postpone building our **Gamma Edition** from Sept. 2023

(TFC2023) to the end of 2023. We will explain to you how to create the Values of WTSP Catalogs, again in a new series, in order to ask you for your cooperation.

First, in this posting, I am going to explain **the (typical) process of building the (Country Part of) World WTSP Catalogs**. See the table in the Top Figure.

Stage (1) In each country, form a small group of volunteers (WTSP Team) of TRIZ leaders/pioneers/practitioners. Try Internet surveys (often done already) and gather TRIZ websites you already know. Visit the websites one by one to understand the contents roughly. Then, write Brief introduction to the website using excerpts from top pages, "About us" pages, etc. Describe Basic Information for Index: besides Site name and URL, Roles of site, and Evaluation in 5 grades (◎○□△—) are important.

Stage (2) List selected websites, together with the descriptions. Discussions about the Evaluation and Roles of site are useful. Ask the site owners for checking the site introduction and for writing their own introductions in Standard Form (mandatory) and fully in a separate file in free format (optional). Collecting all the data, make the Manuscript of Country WTSP Catalogs (◎○□△) as a pair of Index file and Site description file, using hyperlinks to connect the site in Index to the site description. Show the Manuscript to the TRIZ community of your country and submit it to the Project Leader.

Stage (3) Project Leader checks the contributed Manuscript itself, and also checks and adjusts with the descriptions in other parts of published World WTSP Catalogs. and edits it into a completed Manuscript of the Country Part of World WTSP Catalogs.

Stage (4) Now the completed Manuscript is published in the World WTSP Catalogs system as one of the source data of the Catalogs.

Stage (5) The sites in the Country Part are now fully incorporated into the Index parts of (various) World WTSP Catalogs. In this manner, all the contributions of Manuscripts from different countries/SIGs are actively used in the Published World WTSP Catalogs. When any site/part is updated/revised, the process (1) through (5) needs to be followed; revision at Stage (5) is done as either an intermediate version-up or a new Edition (for example every 2 years).

Documents/data of the World WTSP Catalogs system are stored and accessed as follows;

(1) **(Currently active) Published World WTSP Catalogs**: See Top Page of the World WTSP Catalogs [Engrt.](#) This includes: TRIZ sites: (A1) (A1P) ©, (A2)(A2P)©○ ; Around-TRIZ Sites: (C1)(C1P) ©, (C2)(C2P) ©○, (C3) □

(2) **(Currently active) Published Source Data** of the World WTSP Catalogs: See the index page [Engrt.](#) Usually accessed (implicitly) from the Top Page of the World Catalogs.

(3) **(Intermediate Stages of preparation) Manuscripts/drafts** contributed by different countries/SIGs: See the index page [Engrt.](#) To be accessed only by Catalog developers (country editors, Project Leader, etc.)

Contributions of Country Manuscripts (from WTSP Teams) and Full site descriptions (from Site owners) are very welcome, at any time (hopefully by the end of October) to meet the **publication of the Gamma Edition (Dec. 30, 2023).**

Let's work Together ! Connected !! to make the World WTSP Catalogs "Useful and Attractive" !!!
