Intel – Manufacturing Overview

TEST

INTEL TEST TECHNOLOGY

Multiple Test Platform Environment

Intel – Generic Test Setup

At Intel Malaysia we're
Assembling and
Testing 1000's of
Product Types –
Ranging from Digital,
RF and Mixed Signal
Devices

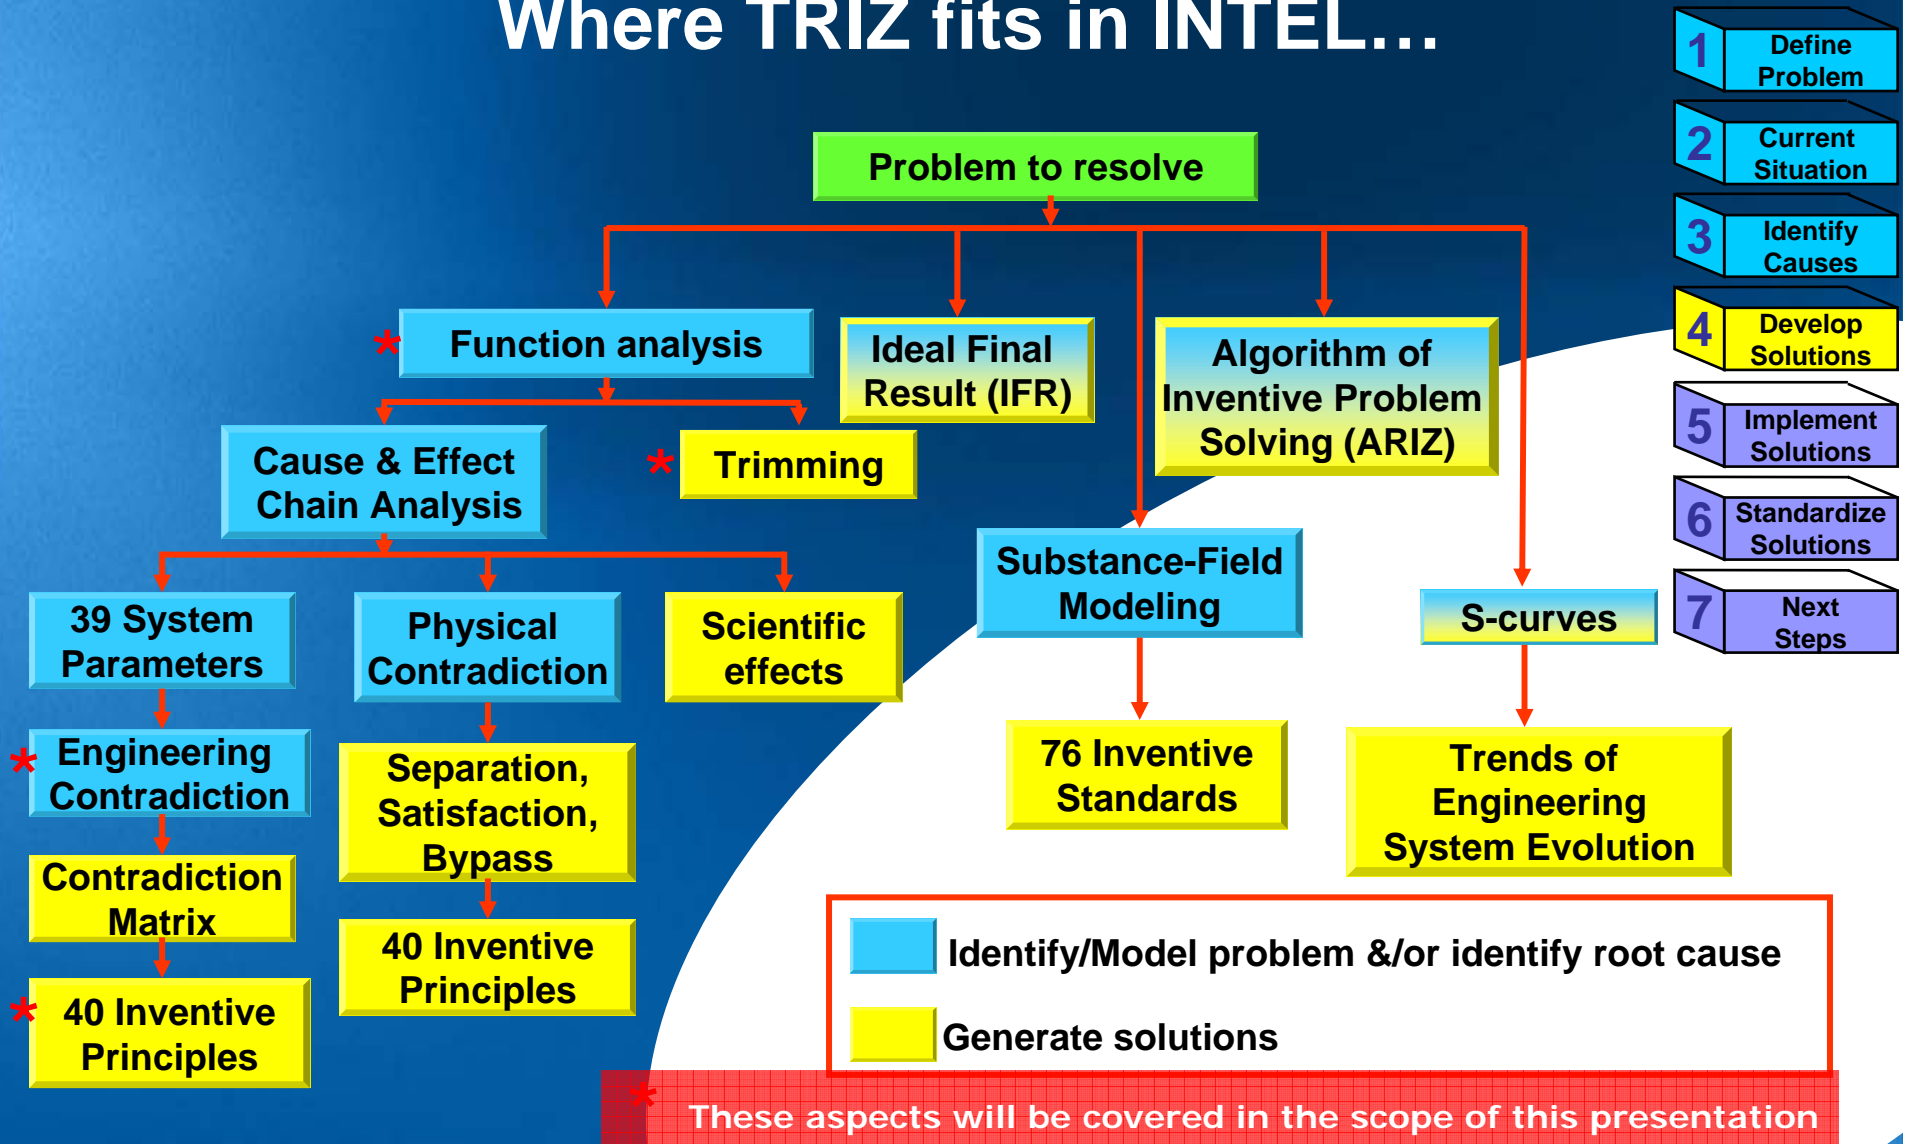

There are many
different types of
TIU (Test Interface
Unit), unique to the
product

There are many
different Test
Contactors,
depending on
device Assembly
Technology and
Product form factor

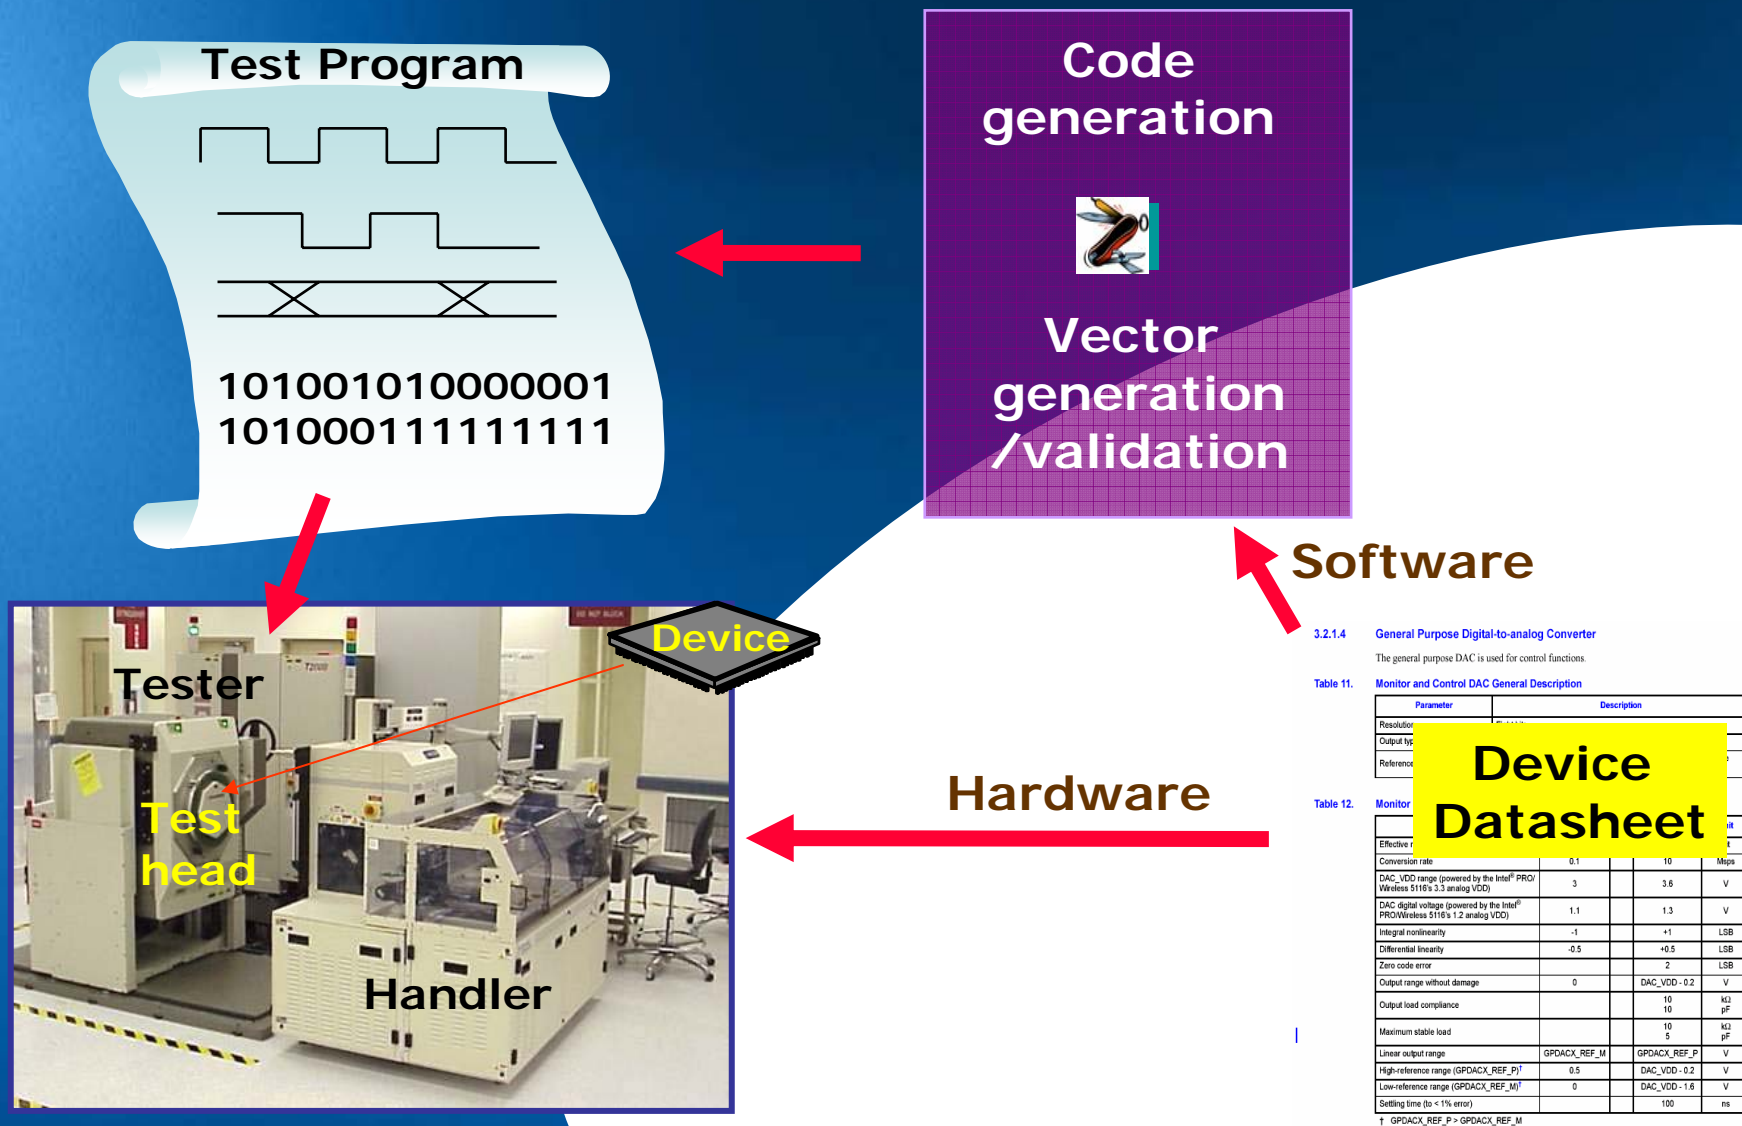

There are 3
different testers -
RF, Mixed Signal
and full digital high
speed testers

Where TRIZ fits in INTEL...

Toolbox which contains root cause analysis and solution generation tools

Test manufacturing - brief introduction

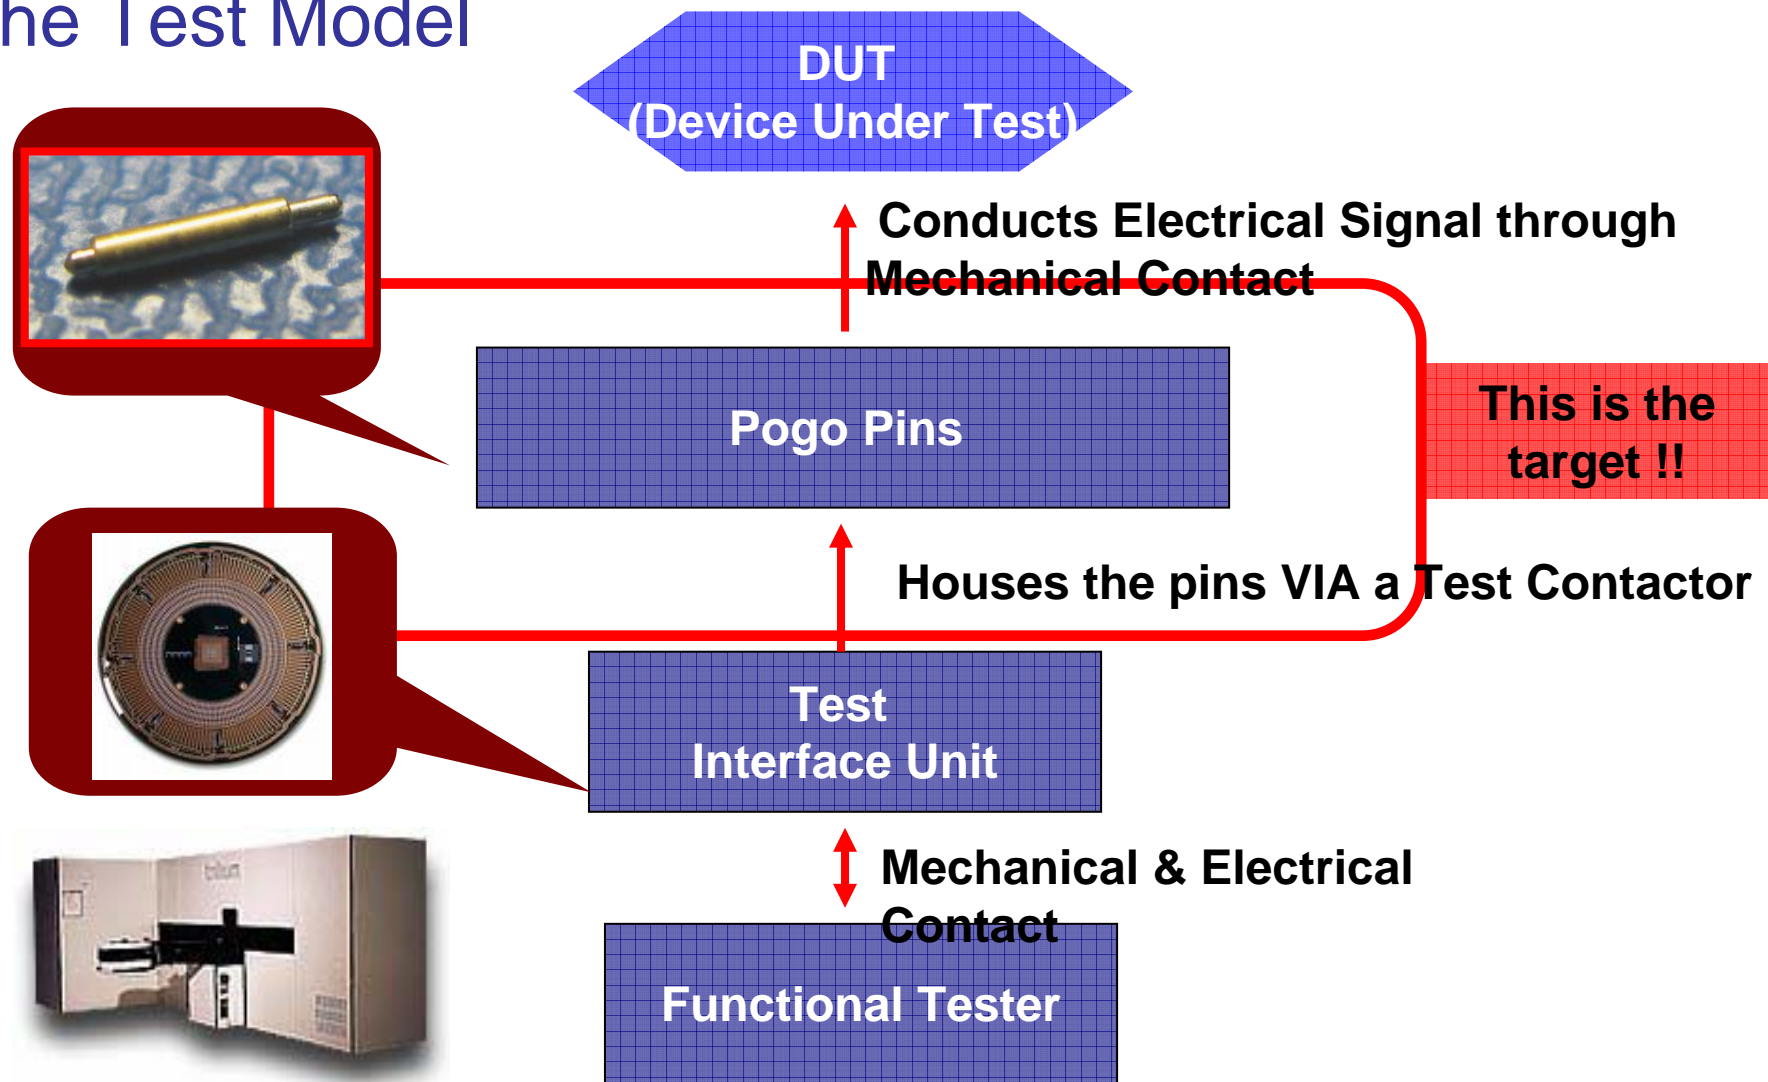

Introduction to Drop and Test Methodology

GENERAL HANDLER PICK AND PLACE MECHANISM

TRIZ – Problem Statement

The Test Model

Problem Statement

Original Problem Statement:

High Test Cost resulted by Pogo Pins

Actual Problem Statement:

Short Pin life and
pins per socket

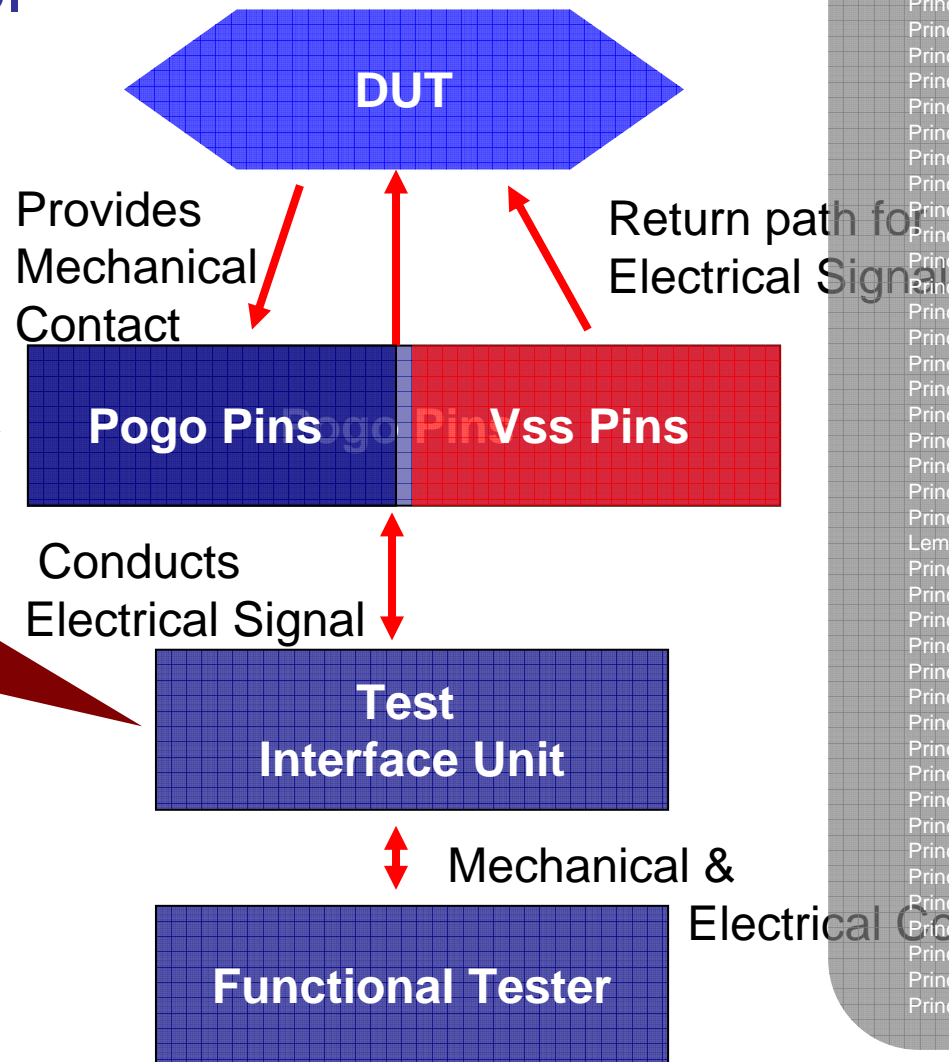

Test Pin Mechanics

TRIZ – Problem Statement

The Test Model

List of the 40 Principles

- Principle 1. Segmentation
- Principle 2. Taking out
- Principle 3. Local quality
- Principle 4. Asymmetry
- Principle 5. Merging
- Principle 6. Universality
- Principle 7. "Nested doll"
- Principle 8. Anti-weight
- Principle 9. Preliminary anti-action
- Principle 10. Preliminary action
- Principle 11. Beforehand cushioning
- Principle 12. Equipotentiality
- Principle 13. The other way round
- Principle 14. Spheroidality - Curvature
- Principle 15. Dynamics
- Principle 16. Partial or excessive actions
- Principle 17. Another dimension
- Principle 18. Mechanical vibration
- Principle 19. Periodic action
- Principle 20. Continuity of useful action
- Principle 21. Skipping
- Principle 22. "Blessing in disguise" or "Turn Lemons into Lemonade"
- Principle 23. Feedback
- Principle 24. 'Intermediary'
- Principle 25. Self-service
- Principle 26. Copying
- Principle 27. Cheap short living objects
- Principle 28. Mechanics substitution
- Principle 29. Pneumatics and hydraulics
- Principle 30. Flexible shells and thin films
- Principle 31. Porous materials
- Principle 32. Color changes
- Principle 33. Homogeneity
- Principle 34. Discarding and recovering
- Principle 35. Parameter changes
- Principle 36. Phase transitions
- Principle 37. Thermal expansion
- Principle 38. Strong oxidants
- Principle 39. Inert atmosphere
- Principle 40. Composite materials

Segmentation

List of the 40 Principles

- Principle 1. Segmentation
- Principle 2. Taking out
- Principle 3. Local quality
- Principle 4. Asymmetry
- Principle 5. Merging
- Principle 6. Universality
- Principle 7. "Nested doll"
- Principle 8. Anti-weight
- Principle 9. Preliminary anti-action
- Principle 10. Preliminary action
- Principle 11. Beforehand cushioning
- Principle 12. Equipotentiality
- Principle 13. The other way round
- Principle 14. Spherification - Curvature
- Principle 15. Dynamics
- Principle 16. Partial or excessive actions
- Principle 17. Another dimension
- Principle 18. Mechanical vibration
- Principle 19. Periodic action
- Principle 20. Continuity of useful action
- Principle 21. Skipping
- Principle 22. "Blessing in disguise" or "Turn of events"
- Principle 23. Feedback
- Principle 24. Intermediary
- Principle 25. Self-service
- Principle 26. Copying
- Principle 27. Cheap short living objects

Return path for
Electrical Signal

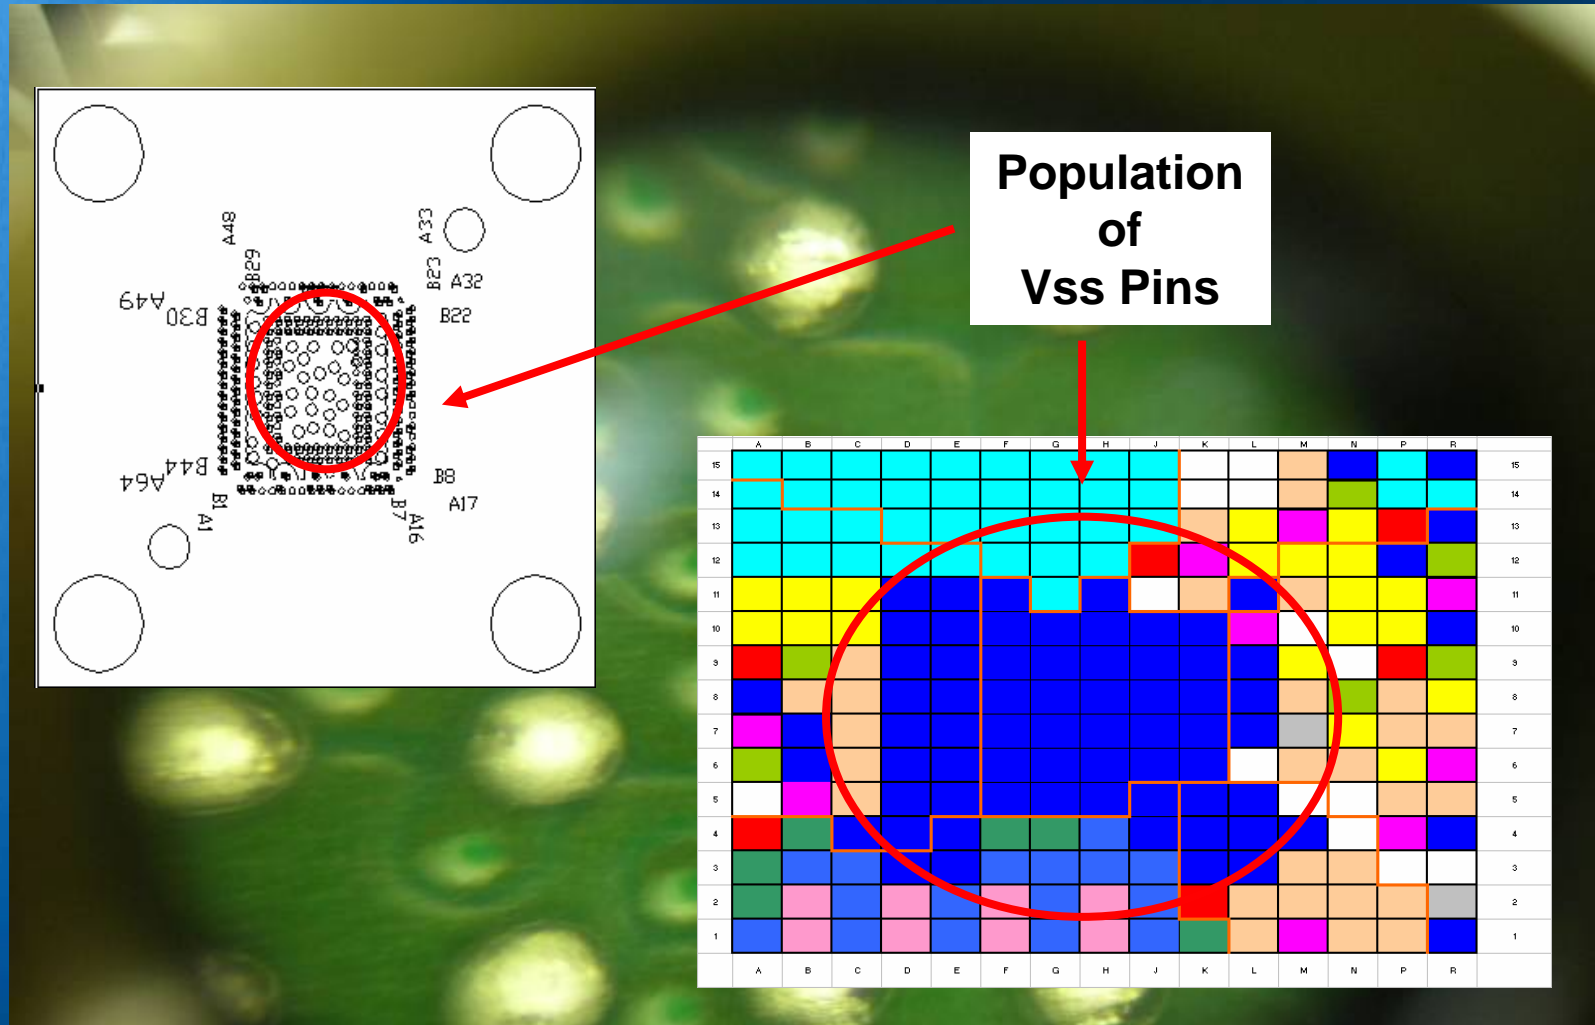

**This is the
target !!**

Problem Statement:
High Cost of pins and high usage

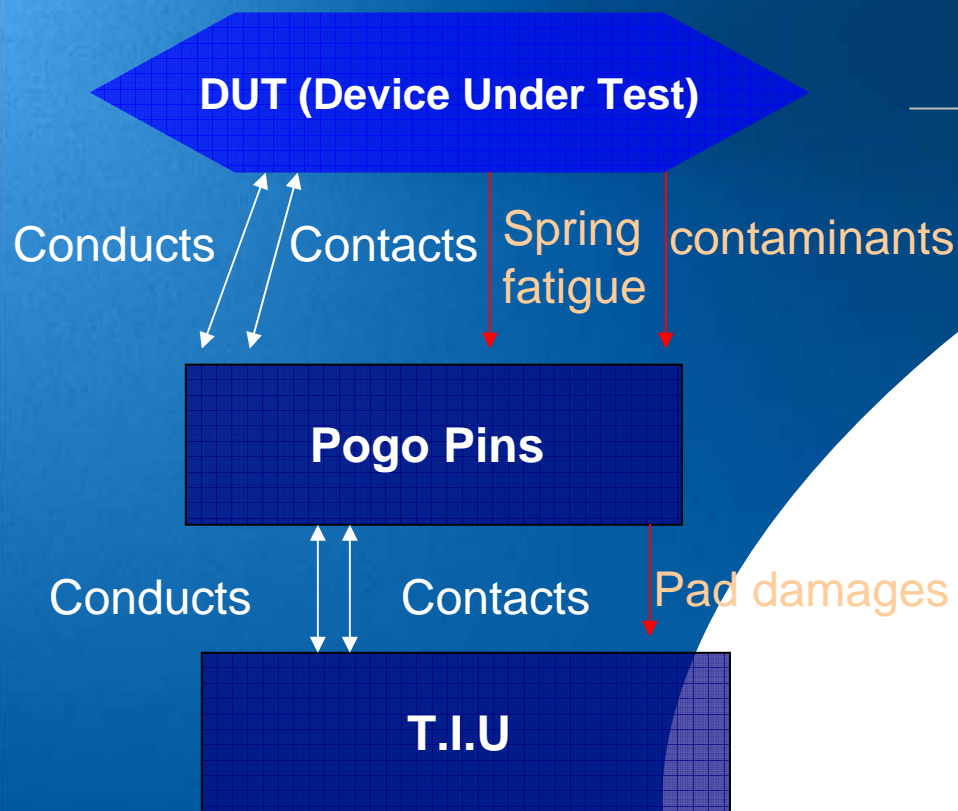

Engineering Contradiction:
Extended usage of Pins will degrade the product yield

Sample of pin population for 2 products

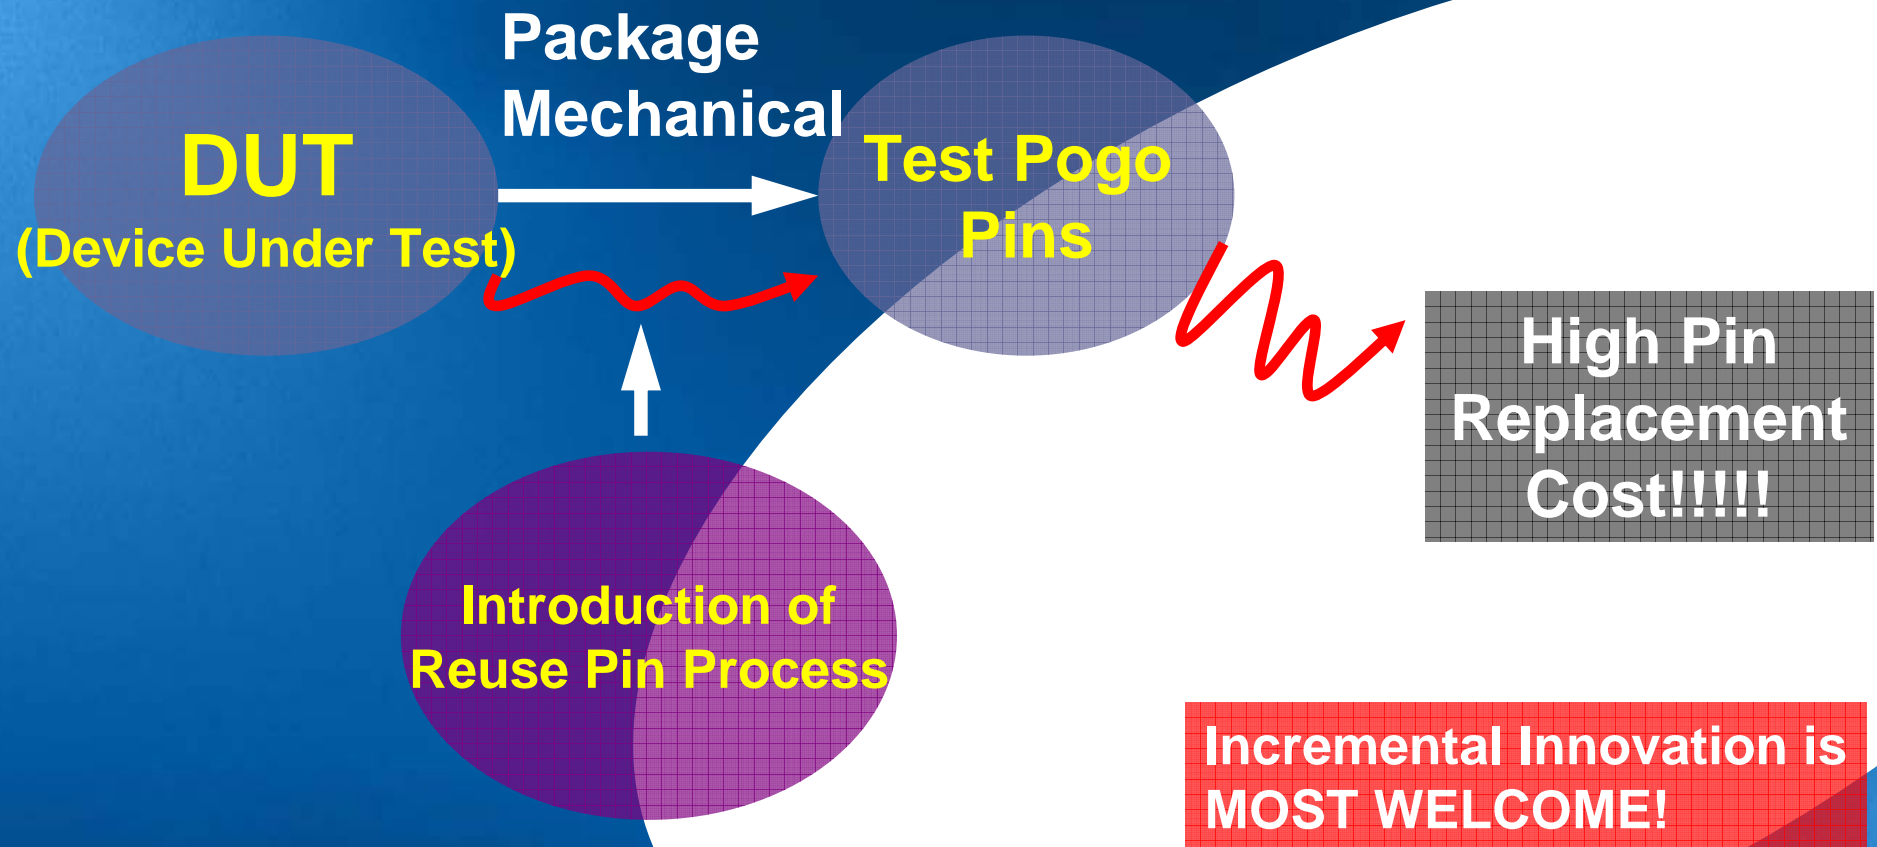

Test Pins – Its Function Model

No	Active Element	Action	Passive Element	Type	Problematic Function
1	DUT	Conducts	Pogo Pins	Standard	
2	DUT	Contacts	Pogo Pins	Standard	
3	Pogo Pins	Conducts	TIU	Standard	
4	Pogo Pins	Contacts	TIU	Standard	
5	DUT	Contaminants	Pogo Pins	Excessive	V
6	DUT	Spring Fatigue	Pogo Pins	Harmful	V
3	Pogo Pins	Pad damages	TIU	Harmful	

Problem Statement

Su Field

Solution – The reuse Process

First Step

Preliminary action

To determine the minimum Impedance $|Z|$ tolerance.
We'll then use our tools (**impedance checker**) to verify the
condition using this Tolerance.

Second Step

Preliminary action

Run 100% of the impedance passing
Minimum of 15g per pin (or according
by manufacturer)

force gauge
tolerances specified

Third Step

Mechanical vibration

100% of the pins that pass **above criteria's** will go through
the sterilization **and drying process.**

Fourth Step

Pin Insertion - re-insert

Solution – The reuse Process

First Step

To determine the minimum Impedance $|Z|$ to
We'll then use our tools (**impedance check**
Tolerance.

Second Step

Run 100% of the impedance passing pins
Minimum of 15g per pin (or according to

Third Step

100% of the pins that passes
and drying process.

Fourth Step

Pin Insertion - re-insertion

List of the 40 Principles

- Principle 1. Segmentation
- Principle 2. Taking out
- Principle 3. Local quality
- Principle 4. Asymmetry
- Principle 5. Merging
- Principle 6. Universality
- Principle 7. "Nested doll"
- Principle 8. Anti-weight
- Principle 9. Preliminary anti-action
- Principle 10. Preliminary action
- Principle 11. Beforehand cushioning
- Principle 12. Equipotentiality
- Principle 13. 'The other way round'
- Principle 14. Spheroidality - Curvature
- Principle 15. Dynamics
- Principle 16. Partial or excessive actions
- Principle 17. Another dimension
- Principle 18. Mechanical vibration
- Principle 19. Periodic action
- Principle 20. Continuity of useful action
- Principle 21. Skipping
- Principle 22. "Mechanical shock" - "Tuning fork principle" - "Monade"
- Principle 23. Feedback
- Principle 24. 'Intermediary'
- Principle 25. Self-service
- Principle 26. Copying
- Principle 27. Cheap short living objects
- Principle 28. Mechanics substitution

Merging

Solution - TCCT In the flesh!!

TCCT Tool at Intel

General Function:

- a) Measures Pin Contact Resistance (CRES)
- b) Measures Pin Spring Force
- c) Measures Pin Mechanical deflection.

- THANK YOU TRIZ!!!!

Summary

- TRIZ WORKS! – The innovative principle and problem and relationship analysis helps us to ‘see’ the problem without distraction
- In this project we applied:
 - Merging
 - Dynamics
 - Preliminary Action
 - Mechanical Vibration
 - Multifunction
 - Feedback
 - Taking out
